SKILLS AND TOOLS

Technical Skills: ReactJS, Next.js, Micro front-end, Module federation, Redux, Zustand, TypeScript, React Native, NodeJS, NestJS, Javascript, MaterialUI, Prime React, Postman, JWT, REST APIs

Soft Skills: Project Management, Team Lead, Empathy, Problem Solving

Tools: JIRA, Confluence, GitLab, GitHub, BitBucket, VS Code, Postman

WORK EXPERIENCE

Senior React Developer

Sarvika Technologies, Jaipur

Dec 2020 - Present

- Pioneered the adoption of micro frontends and module federation, optimising codebase modularity and enabling seamless integration of independent features across projects.
- Spearheaded the development of a US-based ed-tech and e-commerce application using React, Redux, Next.js, TypeScript, PrimeReact, and Material UI
- Collaborated closely with designers to translate conceptual designs into high-quality user interfaces, ensuring seamless integration and user-centric experiences
- Implemented agile methodologies for iterative development, facilitating the delivery of superior applications through continuous improvement, and adaptability.
- Designed and developed reusable custom components to streamline development processes, and promote code maintainability.
- Mentored junior software engineers, providing guidance on coding standards, best practices, and professional development.
- Collaborated with cross-functional teams to identify system requirements, improving software functionality and user experience.

PROJECTS

Learnstage

Education platform digitalization

[Admin Side](#)

- LearnStage is a cloud-based Student Information System (SIS) and digital course suite designed to help schools and districts manage online learning effectively. The platform supports delivery of online courses, student information management, reporting, data analytics, and online tutoring. It provides an end-to-end solution for educational institutions to digitize and streamline academic operations.

Halo Connect

Drop-shipping Platform imagined

- Halo Connect is a US-based e-commerce application designed for managing customers, orders, products, and billing operations. Built using Next.js, TypeScript, and PrimeReact, it delivers a responsive and scalable user experience. The platform streamlines end-to-end e-commerce workflows, ensuring smooth order processing and billing management.

Pernod:

Inventnory management software for BWS industry

- Pernod is a web application developed for the liquor industry, similar to Pernod Ricard operations. It is built with Next.js, TypeScript, Redux, and Redix, and is focused on managing liquor inventory, distribution, and related business processes. The platform enables efficient tracking and administration of liquor products across various channels.

Clowre

Education platform digitalization

[Clowre](#)

- Clowre is a microservices-based platform designed for building and managing applications of any scale. It enables services to be deployed independently or as extensions of existing systems, allowing for modular, flexible, and scalable architectures. Clowre facilitates rapid development and deployment of distributed applications.

EDUCATION

Maharshi Dayanand Saraswati University

B.A. in History and Political science

Ajmer

2020 - 2022
