

Sushil Choudhary

Team Lead | Senior Frontend Engineer | React Native & React.js Developer

+91 7340321143 | sushilchoudhary9871@gmail.com | LinkedIn | GitHub | Portfolio | Jaipur, Rajasthan, India

PROFESSIONAL SUMMARY

Frontend engineering leader with 5+ years building and shipping React.js, React Native, and TypeScript applications for healthcare, ed-tech, and enterprise SaaS products. Currently leads a team of 8+ engineers as Team Lead, with 10+ engineers led or mentored across projects to date, owning architecture decisions, sprint planning, and end-to-end delivery. Deep experience with micro frontend architecture using Webpack Module Federation, reusable component libraries, and native iOS/Android delivery through the App Store and Google Play. Regularly audits project codebases and architecture for quality, risk, and technical debt, and integrates AI-assisted development practices with Claude and GitHub Copilot into daily engineering workflows.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, Vue.js, TypeScript, JavaScript, HTML5, CSS3, Webpack, Vite

Mobile: React Native, iOS, Android, React Navigation, NativeBase, BLE Manager, Firebase

Backend & APIs: Node.js, NestJS, REST APIs, gRPC, WebSocket, Socket.IO, JWT, OAuth 2.0

Forms & Testing: React Hook Form, Zod, Formik, Yup, Jest, Vitest, React Testing Library

Databases: PostgreSQL, Firebase, MySQL, Neon

AI-Assisted Development: Claude, GitHub Copilot, AI-Assisted Code Review, AI-Assisted Development Workflows

Architecture: Micro Frontends, Webpack Module Federation, Feature-Based Architecture, Component-Based Architecture, Reusable Component Libraries

State Management: Redux, Redux Toolkit, TanStack Query, Zustand, LocalStorage, AsyncStorage, Session Storage

UI & Styling: Material UI, Tailwind CSS, PrimeReact, Responsive Design, Dark Mode and Light Mode, Design Systems, Accessibility, WCAG 2.0

DevOps & Cloud: Docker, Kubernetes, GitLab CI/CD, SonarQube, AWS, Utho, Vercel, Railway, Render

Tools: GitHub, GitLab, Bitbucket, Jira, Confluence, VS Code, Postman, Figma, Xcode, Android Studio

LEADERSHIP & PROFESSIONAL SKILLS

- Team Leadership
- Engineering Mentorship
- Project Auditing
- Technical Reviews
- Frontend Architecture
- Technical Decision-Making
- End-to-End Project Ownership
- Sprint Planning
- Agile / Scrum
- Code Reviews
- Quality Standards
- Cross-Functional Collaboration
- Root Cause Analysis
- AI-Augmented Development

PROFESSIONAL EXPERIENCE

Team Lead

Sarvika Technologies · Jaipur, India

April 2026 – Present

- Lead a team of 8+ engineers, directing technical strategy, architecture decisions, and end-to-end delivery across concurrent React.js and React Native projects; 10+ engineers led or mentored to date.
- Own sprint planning and task distribution, breaking down feature scope into deliverable work and aligning engineers to architecture and delivery timelines.
- Established development standards and reusable component libraries built on Micro Frontends and Webpack Module Federation, reducing duplicated effort across teams.
- Enforce code quality through structured code reviews, ESLint, and Husky pre-commit standards across all active projects.
- Conduct project audits and architecture/code-quality reviews to identify technical risk early and guide remediation.
- Integrate AI-assisted development workflows using Claude and GitHub Copilot into the team's daily engineering and review process.
- Oversee CI/CD pipelines and drive continuous improvement of engineering practices across the team.

Senior Software Engineer

Sarvika Technologies · Jaipur, India

January 2025 – April 2026

- Built and shipped React Native applications for iOS and Android, including App Store and Google Play deployments for healthcare products.
- Delivered healthcare applications with BLE medical device integration and real-time health tracking for remote patient monitoring.
- Developed Ed-Tech SIS/LMS features spanning 200+ components across 15+ modules, focused on modular, reusable UI architecture.
- Improved application performance through code splitting, lazy loading, and modular state management patterns.
- Collaborated cross-functionally with product, design, and backend teams to deliver features from specification through release.

Software Engineer

Sarvika Technologies · Jaipur, India

January 2023 – January 2025

- Owned end-to-end delivery of complex features across React.js and React Native applications, including dashboards, data tables, and multi-step forms.
- Built complex forms and validation flows using Formik, Yup, and React Hook Form, and integrated REST APIs across web and mobile clients.
- Led adoption of TypeScript across existing JavaScript codebases to improve type safety and reduce runtime errors.
- Implemented Redux-based state management and reusable component patterns adopted across multiple projects.
- Participated in code reviews and helped establish development standards followed by the wider engineering team.

Web Developer

Sarvika Technologies · Jaipur, India

January 2022 – January 2023

- Developed reusable React components and responsive UI for enterprise SaaS and online tutoring platforms.
- Integrated REST APIs and implemented authentication and authorization flows across client applications.
- Implemented Redux-based state management to support multi-role application workflows.

Web Developer Trainee

Sarvika Technologies · Jaipur, India

March 2021 – January 2022

- Developed features in React.js using hooks, routing, and state management for production client applications.
- Integrated APIs, used Git for version control, and took part in code reviews while learning professional development practices.

- Built foundational React.js features for production client applications, using Git and collaborative development workflows.
- Supported debugging and testing efforts while learning professional development practices.

PROJECTS

Student Information System (SIS) Technical Lead / Independent Ownership

Enterprise Ed-Tech platform with 100+ feature modules, built as independently deployable micro frontends for multi-tenant institutional use.

KEY CONTRIBUTIONS

- Architected the platform using Micro Frontends and Webpack Module Federation, enabling independently deployable, lazy-loaded feature modules.
- Designed multi-tenant architecture with RBAC and fine-grained, role-based permissions across institutions.
- Built real-time WebSocket notifications alongside dashboards, analytics, and reporting for administrators.
- Delivered Student and Parent portals, including payments functionality.
- Integrated AI-assisted assessment and grading features into the platform workflow.

Technologies: React 18, TypeScript, Redux, Material UI, Tailwind CSS, Webpack Module Federation, WebSocket, Docker, Kubernetes

Learning Management System (LMS) Technical Lead / Independent Ownership

Ed-Tech LMS with Admin and Student portals built on a micro frontend architecture, supporting course delivery, assessment, and collaborative learning.

KEY CONTRIBUTIONS

- Built LMS Admin and Student portals as micro frontends covering course management, assessments, quizzes, and assignments.
- Implemented gamification features including badges, e-portfolios, and discussion forums to support collaborative learning.
- Integrated AI-powered content generation and real-time WebSocket updates across the platform.
- Optimized application performance across modules to support scale.

Technologies: React 18, TypeScript, Redux, Material UI, Tailwind CSS, WebSocket, Webpack Module Federation, Docker, Kubernetes

Healthcare Remote Patient Monitoring (RPM) Technical Lead / Independent Ownership

Multi-application healthcare platform spanning a web platform, patient mobile app, and provider/wellness app for real-time remote patient monitoring.

Healthcare Web Platform

- Built a 200+ component platform across 15+ modules, including real-time patient monitoring and a Kanban CRM.
- Designed a healthcare workflow rules engine with RBAC and audit logging for compliance and traceability.

Patient Mobile Application

- Developed a React Native app for iOS and Android integrating BLE medical devices for health tracking and medication management.
- Implemented reminders, reporting, payments, and Firebase push notifications.

Provider & Wellness Application

- Built provider/client workflow tooling including AI-assisted wellness planning, diet planning, and workout/exercise management.
- Deployed the application to both the App Store and Google Play.

Technologies: React.js, React Native, TypeScript, Redux, Redux Toolkit, React Navigation, BLE Manager, Firebase, Material UI, Recharts, Docker

Enterprise Workflow Platform Team Contribution

Enterprise workflow platform composed of 6 independently deployable micro frontend modules behind a shared shell application.

KEY CONTRIBUTIONS

- Contributed to 6 independently deployable Micro Frontend modules: Form Builder, Ticket Management, Certificate Management, Gatekeeper, Workflow Management, and the Shell application.
- Integrated APIs and built permission-based workflows using Module Federation across modules.
- Supported multi-environment deployments across the module set.

Technologies: React.js, Redux, Material UI, Formik, Axios, Webpack Module Federation, Kubernetes

Online Tutoring Platform Team Contribution

Multi-role online tutoring platform with real-time messaging, scheduling, and payment workflows.

KEY CONTRIBUTIONS

- Built real-time messaging using Socket.IO and timezone-aware scheduling for tutor availability.
- Implemented payments, wallet, subscriptions, and payouts for tutors and students.
- Built administrative dashboards for analytics and user management, deployed via GitLab CI/CD.

Technologies: React.js, Redux, Material UI, Socket.IO, Recharts, Docker, Kubernetes, GitLab CI/CD

Internal Commerce & Order Management Platform Team Contribution

Internal e-commerce order management platform built for account executives and order processing teams.

KEY CONTRIBUTIONS

- Developed an internal e-commerce order management platform for account executives and order processing teams.
- Built workflows using Next.js 14 App Router, TypeScript, Zustand, TanStack Query, React Hook Form, and Zod.

Technologies: Next.js 14 (App Router), TypeScript, Zustand, TanStack Query, React Hook Form, Zod

CERTIFICATIONS

- Claude Code Actions — Anthropic Certifications
- Agent AI — Anthropic Certifications
- MCP Servers — Anthropic Certifications
- Claude API and Usage — Anthropic Certifications

EDUCATION

Bachelor of Arts (B.A.) - History & Political Science 2020 – 2023

Maharshi Dayanand Saraswati University, Ajmer

Senior Secondary (XII) - Science Stream 2018

Jai Rana Senior Secondary School, Jasnagar

Secondary School (X) 2016

Jai Rana Senior Secondary School, Jasnagar
